

Child Injury Review Flowchart – WACHS Wheatbelt

Patient \leq 2 years of age presents to ED triage with burn/injury /poisoning

1. MO notified (either on-site or ETS)
2. Completion of [WACHS WB MR4A Emergency Paediatric Injury Risk Assessment Form](#) and follow required actions
3. During this time the safety of the child must be maintained and further action taken as per [Department of Health. Guidelines for Protecting Children 2015 \(pp4\)](#)

The patient's MR1 and completed Paediatric Injury Assessment form are scanned at site and sent to wheatbelt.childinjurynotification@health.wa.gov.au

Safety Net Review Process

1. Clinical Event Management Network (CLEM)
Administrative Officer collects scanned notes for cases from the preceding week and any uncleared backlog.
2. Each case is reviewed by the CLEM team and follow-up of individual cases arranged if any concerns identified. A log of reviewed cases is maintained by the CLEM administrative support officer for the purposes of audit and evaluation
3. Outcomes are recorded in the relevant CLEM meeting notes.
