

Concentrated Potassium-Containing Solution Tracking Sheet – Patient Specific Supply

POTASSIUM CHLORIDE 10mmol/10mL Ampoules

- Standard premixed (diluted) bags containing potassium chloride are to be utilised in preference to non-standard solutions requiring preparation in all areas.
- Concentrated Potassium chloride products are only imprested on ICU at Bunbury Hospital.
- Concentrated Potassium chloride products, for non ICU patients, are to be sourced from Pharmacy. These are to be provided on an individual patient basis and unused ampoules are to be returned to Pharmacy once therapy has ceased.

Date	Time	Ward	Patient (Full Name and URMN)	Prescribed Order (including fluid type and volume)	Qty of amps taken	Taken by: Name and Signature	Documented Consultant approval for non- standard solution requiring ampoules to be issued? Who?
31.01.2020	1825	ED	Joe Bloggs – J5465415	Potassium Chloride 30mmol in Sodium Chloride 0.9% (500mL)	3	John Doe SIGNATURE	Yes. Dr Smith

- Due to medication safety risk issues standard premixed bags containing potassium chloride are to be utilised in preference to non-standard solutions requiring preparation, in all areas. The prescription of non-standard potassium chloride solutions is **only** permitted at the direction of a Consultant.

POTASSIUM DIHYDROGEN PHOSPHATE 10mmol/10mL Ampoules

- Concentrate Potassium dihydrogen phosphate ampoules are only stored in Pharmacy.
- These are to be provided on an individual patient basis for fluid restricted ICU patients only and unused ampoules are to be returned to Pharmacy once therapy has ceased.

Date	Time	Ward	Patient (Full Name and URMN)	Prescribed Order (including fluid type and volume)	Qty of amps taken	Taken by Name and Signature	Documented Consultant approval for non- standard solution requiring ampoules to be issued
31.01.2020	0530	ICU	Jessie Bloggs – K6547604	Potassium Dihydrogen Phosphate 20mmoL in Sodium Chloride 0.9% (100mL)	2	John Doe SIGNATURE	Yes. Dr Smith

- Due to medication safety risk issues standard premixed bags containing potassium chloride are to be utilised in preference to non-standard solutions requiring preparation, in all areas. The prescription of non-standard potassium chloride solutions is **only** permitted at the direction of a Consultant
- Prescription and administration of phosphate supplementation should occur in line with the [WACHS Specialised Medication – Phosphate Guideline](#)
