Acknowledgement

WA Country Health Service acknowledges the Aboriginal people of the many traditional lands and language groups of Western Australia. We acknowledge the wisdom of Aboriginal Elders past and present and pay respect to Aboriginal communities of today.

Salary and Fixed Terms

Salary indicated below is based on the WA Health System Medical Practitioners AMA Industrial Agreement 2022
Note: Superannuation 11.5% is from 1 July 2024. Salary rates for 2025 are yet to be published.

South 26th Parallel

Registrar Yr 1-7

\$139,305 - \$186,790p.a.*

Hospital Site: Albany, Bunbury, Geraldton and Kalgoorlie

* Includes base salary \$115,028 to \$157,053 pa, professional development allowance \$10,472 pa and 11.5% employer contributed superannuation.

Senior Registrar Yr 1-2

\$204,757- \$214,046p.a.*

Hospital Site: Albany, Bunbury, Geraldton and Kalgoorlie

* Includes base salary \$168,679 to \$177,010 pa, professional development allowance \$14,496 pa and 11.5% employer contributed superannuation.

North 26th Parallel

Registrar Yr 1-3

\$163,260 - \$178,561p.a.*

Hospital Site: Broome, Karratha, Hedland

* Includes base salary \$135,950 to \$149,673 pa, professional development allowance \$10,472 pa and 11.5% employer contributed superannuation.

HSMP Yr 1-6

\$268,320 - \$336,894p.a.*

Hospital Site: Broome, Karratha, Hedland

* Includes base salary \$208,720 to \$270,122 pa, professional development allowance \$31,926 pa and 11.5% employer contributed superannuation.

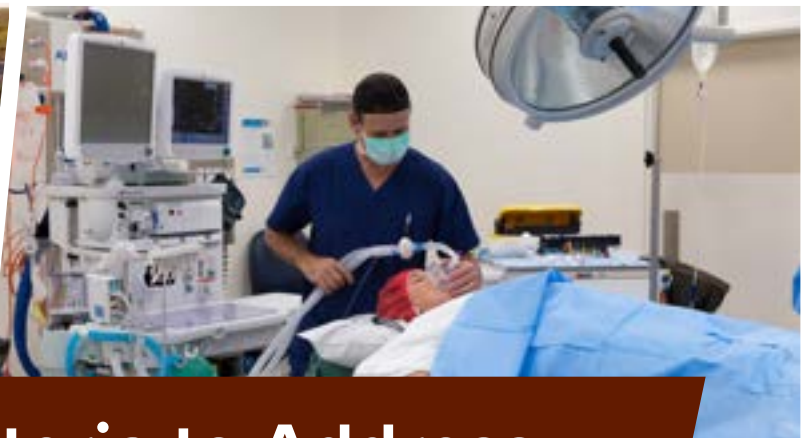

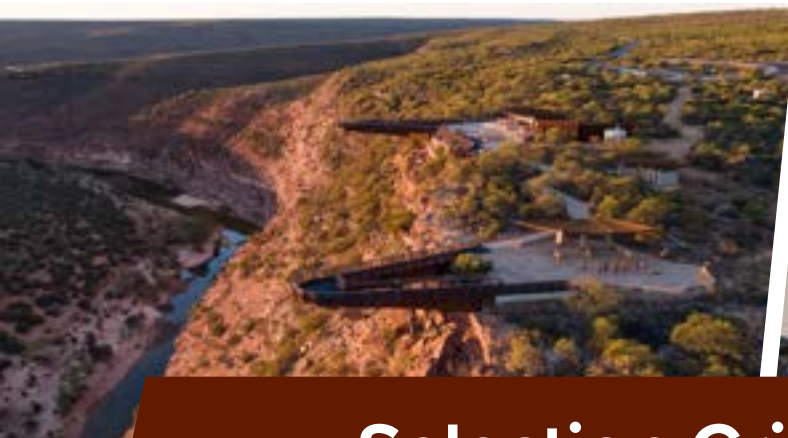

Six- or 12-months Fixed Term, Full time or Fixed Term, Part Time appointments commencing February and August 2025.

Please note, employees who move between different WA Department of Health entities retain their leave entitlements (annual leave, long service leave, personal leave and professional development). Accepting and working under a rural contract is not viewed as a break in service.

Relocation

As an Advanced Trainee, you will be eligible for relocation and accommodation allowances.

These relocation and accommodation entitlements can be discussed further at interview and/or appointment with each Region.

Selection Criteria to Address

Essential

1. Eligible for registration by the Medical Board of Australia.
2. Enrolled in Paediatrics Training Program, Royal Australasian College of Physicians (RACP) or equivalent programs and demonstrates satisfactory progression appropriate for an advanced trainee.
3. Demonstrated current clinical experience in paediatrics and the management of acutely unwell children and neonates.
4. Demonstrated organizational and time management skills, with highly developed communication, interpersonal, negotiation and conflict resolution skills.
5. Commitment to undergraduate and postgraduate medical teaching of resident, nursing staff and medical students.
6. Demonstrated commitment to clinical governance (Patient Safety and Quality), quality assurance, continuous improvement and clinical research in the field of paediatrics and adolescent health.
7. Demonstrated understanding and knowledge of Aboriginal Cultural Respect Framework.
8. Current C Class drivers license and an ability and willingness to travel including overnight stays away from home.
9. Experienced or interest in rural paediatric practice in rural setting.

Desirable

1. Possession of current Advanced Life Support, Advanced Paediatric Life Support or Emergency Management of Severe Trauma certificates.
2. Demonstrated ability to monitor and review own effectiveness.
3. Experience working with clients from a variety of cultural / ethnic backgrounds.

Potential Rotations

Outreach clinics to Katanning for both developmental and medical paediatrics.

Profile of work

General paediatric inpatients, community developmental and behavioural clinics, outreach clinics, Aboriginal health, child protection.

Service Type

The Great Southern Paediatric Service is the newest of the WACHS Paediatric services and will continue to develop and expand over the coming years.

The service provides both inpatient and outpatient care for the children of the Great Southern Region. Currently deliveries only occur from 37 weeks gestation and there is no on-site nursery however this is likely to change within the next 12 months. Deliveries are attended by GP obstetricians with support from the paediatricians when required.

The advanced trainee has the opportunity to run the ward rounds independently with consultant support giving them the experience of a junior consultant. In addition, the advanced trainee can provide a first on call service over night with consultant back up.

Outpatient clinics are separated into medical and developmental clinics. The advanced trainee attends 1-2 developmental and 1 medical clinic per week.

The service also provides outreach medical and developmental clinics to Katanning and the advanced trainee can attend these clinics should they desire.

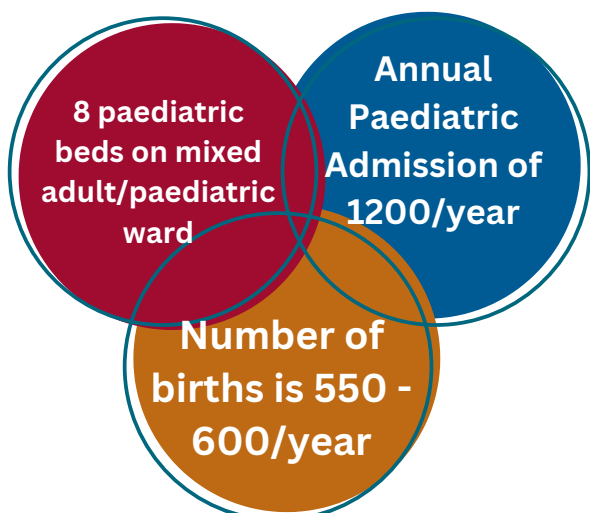

There is appropriate allied health support including social work, dietetics and psychology working within the paediatric team and the service has a close relationship with the Child Development Service and CAMHS.

Staffing and Supervision

- 4 consultant paediatricians sharing 3.0 FTE
- 2 full time Resident Medical Officers
- 1 junior registrar working full time
- Advanced trainee works a business hour 9 day fortnight with a long weekend every 2nd week. They are on call one night/week with consultant support and a maximum of one in 4 weekends.
- Close supervision by on site paediatrician with appropriate support to work independently if the trainee is at that level.

Teaching and Learning

- Weekly paediatric department teaching
- Local Grand Rounds & ED/Critical care Teaching
- VC links available to PCH for registrar teaching (General Paediatric meeting and Grand Rounds)
- Able to attend weekly State Child Development Center Developmental teaching and accredited for attendance at CCH educational tutorial series via VC
- Fortnightly Child Safety Net meeting
- Weekly Triage meeting
- Weekly multidisciplinary team meeting
- Close supervision by consultant on site for outpatient and inpatient case discussions.
- Expectation that AT will contribute to RMO and medical student teaching including providing case-based tutorials at the Rural Clinical School on occasion.

Experience life in the Great Southern Region

The Great Southern region is located on the south coast of Western Australia, adjoining the Southern Ocean, where the coast extends for approximately 250 km. The total land area is 39,007 sq km (including offshore islands), representing approximately 1.5 per cent of the State's total area. The regional population is approximately 60 000 of which 14 000 are under 17 years.

The historic port town of Albany, which is the State's oldest European settlement, has one of the best natural anchorages in the Southern Hemisphere and is the region's administrative centre. It has a population of 40 000 and is the site of the Regional Hospital and base for the regional paediatric service.

People living in the Great Southern enjoy a region that is unmatched in Western Australia for the scale, diversity, and accessibility of its natural attractions.

You can go from the depths to the heights in a single day: from exploring a dive wreck in the waters of King George Sound in the morning to the top of southern Western Australia's highest peak, Bluff Knoll in the afternoon.

Advanced trainees are provided accommodation support for the duration of their stay and are rostered to allow a 3 day weekend once/fortnight to enable them to explore this beautiful region.

The Great Southern is Western Australia's most southern region, bordered by the South West, Wheatbelt and Goldfields Regions.

A vibrant restaurant/café and arts scene contributes to the attractive lifestyle on offer.

Broome Regional Hospital

General Paediatrics trainees:

General Paediatrics with a perinatal component.

•6-month rotation: General Paediatrics

•12-month rotation: options of 6-month acute care or 6-month community/developmental

CCH: 6 months may be accredited in setting of 12-month rotation.

Broome Health Campus (BHC) has a busy 8-bed inpatient unit, a level 2 nursery with regional neonatal transports, and a fascinating outpatient program across the Kimberley region. We have a strong teaching focus, providing supervision of RACP and prevocational trainees, and opportunities to engage in Population Health and research activities. The team aims to set the standard for remote specialist services in Australia.

The Regional hospital and base for the paediatric service is Broome. Across the team, we visit other regional towns & communities, with travel approximately 5 days per 4-6 weeks. Outpatients encompass diverse general paediatrics and dedicated developmental services.

Our hospital has a strong generalist team, with surgical and obstetric services as well as visiting paediatric subspecialties. After hours, we provide a telephone advice service to clinicians across the region, with routine ward calls, admissions and first line neonatal resuscitation conducted by the hospital District Medical Officers. Attendance after hours is therefore reserved for more severe clinical situations, and registrars have access to consultant support at all times.

From Cape Leveque to the Gibb River Road, the Kimberley remains one of Australia's great wilderness areas, whilst offering great services, education, and partner employment opportunities. This is the perfect job for someone looking for that elusive work-lifestyle balance! Generous allowances offered which includes provision of housing at a subsidised rental rate, district, and on-call allowance.

Service Type

- Inpatient including neonatal care
- Outpatients – general paediatric & developmental, including Griffiths assessments
- Small Child Protection component

Staffing and Supervision

- 5 x 0.8 FTE General Paediatricians
- CCH supervisor available
- 2 advanced trainee positions (IRTP role filled for 2022, 2023, & 2024 therefore one position available)
- Rotating pre-vocational residents
- Dedicated paediatric nursing staff, including 2 paediatric Nurse Practitioners

Teaching and Learning

- Weekly Rural Health videoconference program
- Weekly CDS Friday afternoon sessions
- Local weekly teaching session
- Access to hospital weekly RMO teaching
- Regular remote Neurology teaching
- Provision of teaching to medical students & residents

Get in touch

For more information

Dr Anna Robson,
anna.robson@health.wa.gov.au
9194 2222

8 paediatric beds & 3 cots on paediatric ward

Annual Paediatric Admission of 2000/year

Number of births is 350/year

Potential Rotations

The role is mixed, with inpatient / outpatient / regional travel elements varying week to week.

Profile of work

- Monday – Friday business hours base roster
- On-call approx. 1 weeknight & 1 weekend per month, with rostered time for ward round & RDO during week
- Intermittent neonatal transports, according to skill level
- Outpatient travel approx. 1 week / 4-6 weeks

Experience life in the Kimberley Region

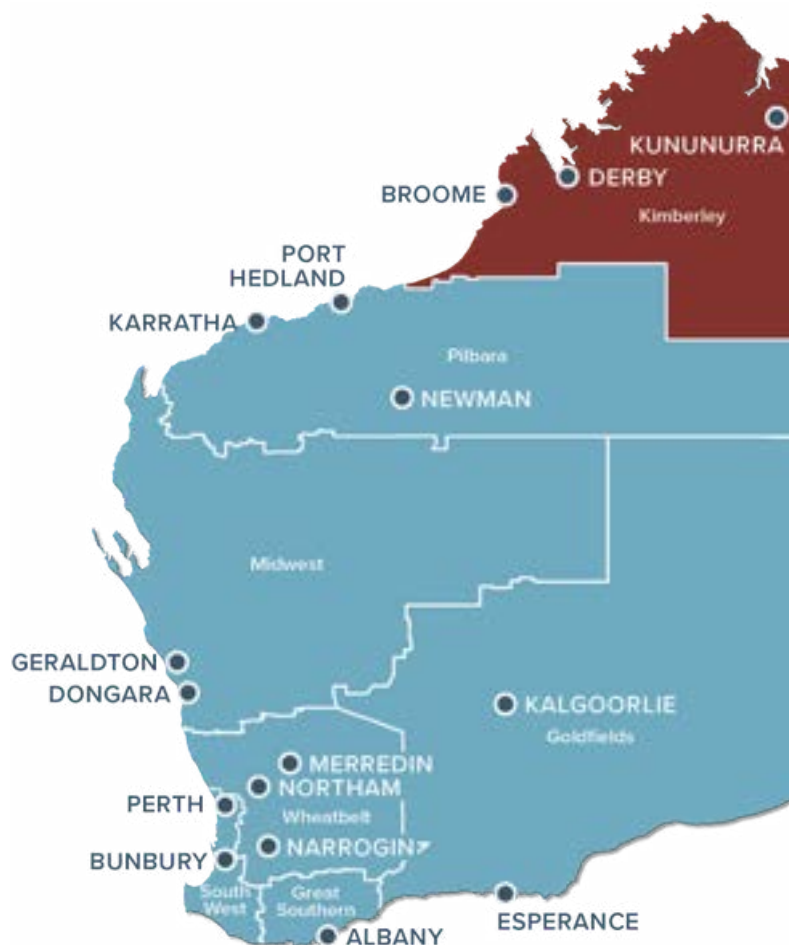

The Kimberley is the most northern region in Western Australia, a coastline closer to South-East Asia than Perth. Internationally recognised for its unique and dramatic landscape, the region includes spectacular gorges, waterfalls and cave systems, and an astonishing variety of wildlife.

Geographically diverse – the Kimberley boasts pristine white beaches, rugged and spectacular ranges and gorges, palm lined chasms, secluded waterholes, tidal mudflats and some of the largest and most beautiful rivers and waterways in the world. It has the ability to keep people intrigued for many years through the diverse range of activities, rich cultural history, diversity of working experiences and mix of friendly people and unique characters. Relaxed and laidback – a lifestyle envied and sought by thousands of visitors each year.

Broome Health Campus serves one of the State's leading tourist destinations. The 60-bed hospital provides health care to a resident population of 17,000 which expands to 55,000 during the tourist season.

Broome Health Campus is the regional resource centre for the Kimberley and resident and specialist medical staff provides health care services to hospitals, community and remote sites across the region. The hospital has undergone an eight-year redevelopment providing North-West residents access to a high quality, modern health service to match the Kimberley region's growing demands.

The major upgrade includes new operation theatres, consulting rooms for visiting specialists, a public dental surgery, refurbished maternity unit and an expanded \$10.4 million Emergency Department which has more than doubled to 15 acute bays. The campus is also now equipped with the latest specialist equipment and provides a modern and purpose-built environment for patients to receive high quality care. Broome Health Campus provides specialist care in General Medicine, General Surgery, Paediatric, Psychiatry, Obstetrics/Gynaecology along with Rural Generalist Terms and is supported by other visiting specialists. Our Paediatric and Psychiatric Units at Broome Health Campus opened in 2012.

KEY

- Major towns
- Kimberley region

Bunbury Health Campus

Accredited for General paediatrics with perinatal component & rural paediatrics, and core acute paediatrics
Accredited for Centre of Community Child Health (CCCH) community/developmental and social paediatrics (over a 12-month position)

Bunbury Hospital, South West Health Campus is the Jewel of the South West!

Close to all the surf, wineries, cycling heaven, fooderies, dolphins and arts/crafts that you could ever want.

Paediatricians willing to give a keen Advanced Trainee (AT) the best possible chance of increasing their confidence in the Junior Consultant Role, meeting their RACP requirements, providing a supported experience and family friendly environment.

Service Type

General paed with neonatal component (34+weeks GA or stabilisation and transfer of <34 week GA via NETSWA)

There is a community developmental paed service that continues to grow, with a dedicated 6-12 month community developmental registrar position.

General Paediatric ATs have opportunity to attend rotational developmental clinics at Hudson Road and Busselton CDS.

There are 4 sessions of registrar medical outpatient clinics per week, 3 sessions of consultant paediatric medical clinics and revolving developmental clinics (roster differs for community registrar and hospital-based registrars).

We have a busy ED where over 40% presentations are paediatric.

We are the regional paediatric hub and when on call you will field calls (with consultant support) from local towns such as Augusta, Margaret River, Busselton, Bridgetown, Donnybrook, Collie, Harvey & Manjimup.

0417 932 178

or

Dr Carsten Broeze, Consultant Paediatrician
carsten.broeze@health.wa.gov.au
0413 261 738

Potential Rotations

5.0 FTE of paediatric advanced trainees, one of the four hospital-based spots may suit an ACCRM registrar who has done at least 6-months paediatrics and wants a 12-month position. One position based at Child Development, the other four at the hospital: 6-month or 12-month terms available. One position is STP funded.

Profile of work

You work with an on-call paediatrician, onsite until 4.00 pm on weekdays and during completion of weekend ward rounds, then on-call after-hours.

There is 24-hour resident coverage.

Assessment and admission of ED patients, completion of inpatient ward rounds and ward assessments, attendance at deliveries on labour ward and in theatre, and management of neonates in SCN – wide range of neonatal to adolescent presentations and acuity. Covering of the first on-call roster - consultant no more than 15 mins away and always willing to assist in person.

Opportunity to complete new outpatient logbooks, child protection logbooks and RACP AT Research Project requirements.

- On call requirement as per roster which can be requested.

The South West Region is an area of magnificent beauty on the South West Coast of Western Australia. Stretching from Busselton along the shores of Geopraphe Bay down to Augusta the most south-westerly point of Australia.

Bunbury is a picturesque harbour city on the south west coast of WA, 175km or two hours' drive from Perth. The area is blessed with spectacular and pristine beaches, abundant opportunities for outdoor activities such as caves, adventurous walks and trails and world class surfing spots. It is also renowned for its divine cuisine, welcoming locals and award-winning wines in nearly every direction.

South West residents have a high sense of community and rate their region as a safe place to live and raise children, with excellent access to services such as health and education contributing to their positive lifestyle and general wellbeing.

Geraldton Health Campus

RACP Accredited for 6 months rural and perinatal component, 6 months psychosocial component when 12 months is done.

Profile of work

Gen paed inpatients, neonates community developmental and behavioural clinics, outreach clinics, Aboriginal health.

Experience life in the Midwest Region

Geraldton is the largest town 425km north of Perth and one of the most attractive coastal centres in Western Australia. It is both a seaside resort and an important port. It offers beachside living alongside rural life as well as a wide range of recreational, shopping and educational facilities.

Geraldton is the capital of Western Australia's Midwest and gateway to the magnificent Abrolhos Islands. It has an enviable Mediterranean climate and a relaxed seaside lifestyle which lends itself to a host of activities, especially water sports. In addition to the spectacular turquoise water and white sandy beaches, Geraldton has a booming café and restaurant scene. There are great schools which are located a short drive from the hospital.

The 10 Best things to do whilst in the Midwest:

- Kalbarri National Park
- Hutt Lagoon (Pink Lake)
- Ningaloo Reef
- Abrolhos Islands
- Monkey Mia
- Cape Range National park
- Exmouth
- Coral Bay
- Murchison River
- Geraldton

Geraldton Hospital has 100 hospital beds for acute medical, surgical, paediatric and maternity patients with a 24-hour Emergency Department, onsite chemotherapy and renal dialysis. It provides a comprehensive range of patient care service including medical imaging and pathology. Visiting specialists, including medical oncology, haematology and renal physicians provide varied learning opportunities for junior doctors.

The hospital has a strong association with the local Aboriginal Medical Service (GRAMS), Private Hospital (SJOG) and GP community. There are plans well underway for redevelopment of the emergency department and inpatient services. Individual department models of care are under review, with medical workforce profiles strengthened. This is an exciting time to join the service!

Hedland Health Campus

Accredited for 6 months rural General Paediatrics with perinatal component, For 12 months training the options are:
12 months General Paediatrics
6 months GP and 6 months Community/Development

Hedland Health Campus (HHC) gives you the opportunity to practice as a Junior Consultant in a supported environment.

HHC is the Regional Centre for the Pilbara, with 47 beds in total. HHC is the Pilbara Regional SCN and the Paediatricians provide the Pilbara NETS service, utilising RFDS aircraft based In Hedland, when appropriate or retrieval ex Perth is not possible.

Port Hedland has a population of 14500 people, of which 16.7% identify as Indigenous. Children account for nearly 24% of the population.

The Pilbara comprises nearly 508 000 sq km of beautiful, rugged country. Karijini and Millstream- Chichester National Parks are the highlight. Fishing in the Dampier Archipelago or the Montebello Islands for those so inclined is also a must do.

Port Hedland is only a leisurely 6 hour drive from Broome (very doable on a long weekend) and 8 hours from Exmouth. Between Port Hedland and South Hedland there are good sporting facilities including two 50m pools, a dedicated recreational centre with squash/gym/indoor basketball, outdoor sports as well as ideal kite-surfing/foiling conditions off the spoil-bank.

The Pilbara has a large Indigenous population with many health problems. A number of these, such as Acute rheumatic Fever and Rheumatic Heart Disease are not common in urban or less remote regional areas.

Get in touch

For more information

Dr Michael Birch, Consultant Paediatrician and HOD
0420 232 758

Potential Rotations

More Outreach opportunities may be possible as Staffing Improves across the Pilbara.

Profile of work

Gen paed inpatients, mixed Gen paed, developmental and behavioural clinics, outreach clinics, Aboriginal health

Teaching and Learning

- VC links available to PCH for registrar teaching or SCDC – flexible as to the learning needs of the AT
- At least weekly supervision with consultant on site for outpatient case discussion
- Weekly Hospital wide X-Ray and education meeting
- Ability to attend other training as necessary

Staffing and Supervision

- 2.4 salaried Consultant FTE (3x 0.8FTE) and 0.8 Locum Consultant FTE (so 3.2 consultant FTE), 1 RMO from SCGH
- At any given time, 1 salaried and 1 Locum Consultant is present. The Consultants work a compressed roster, amounting to 2 weeks on / 2 weeks off.
- Active recruitment will be occurring to increase to 4 0.8FTE salaried consultants. There will also be 2 consultants in Karratha as part of this recruitment process.
- Registrar has 5 nights a fortnight on call with consultant back up.
- No Weekends or Pubic Holidays
- Roster a 9 day fortnight (i.e. a long weekend every second week)

8 paediatric beds on Children's Ward

Annual Paediatric Admission of 500/year

Number of births is 350/year

Karratha Health Campus

Accredited for 12 months
rural General Paediatrics
pre fellowship

For 12 months training the
options are:

•12 months General
Paediatrics (includes
developmental work)

Karratha Health Campus (KHC) has a busy paediatric service. With a population heavily weighted towards young families KHC can give you the opportunity to practice as a Junior Consultant in a supported environment.

KHC is the biggest hospital in the West Pilbara with 40 beds in total. It sees between 21 and 23000 presentations a year through its emergency department. Hedland Health Campus is the Pilbara Regional Special Care Nursery at this stage but KHC is expected to have its own special care nursery in the near future.

Karratha has a population of 23,000 people with a median age of 33 years, of which around 11% identify as Indigenous. Children account for 25% of the population. Karratha is the hub of the west Pilbara and KHC supplies outreach paediatric services to surrounding towns.

The Pilbara comprises nearly 508 000 sq km of beautiful, rugged country. Karijini and Millstream- Chichester National Parks are the highlight. Fishing in the Dampier Archipelago or the Montebello Islands for those so inclined is also a must do. Karratha is an 8 hour drive from Broome (very do-able on a long weekend), 3 hours from Onslow and 6 hours from Exmouth.

Socially there are lots of sports clubs, great facilities, gyms, opportunities for learning and socialising. There is a multipurpose performing arts centre. The main industries are oil and gas, iron ore, salt and fertiliser. The town is serviced by multiple flights too and from Perth each day via Virgin or Qantas.

The Pilbara has a large Indigenous population with many health problems. A number of these, such as Acute rheumatic Fever and Rheumatic Heart Disease are not common in urban or less remote regional areas.

Profile of Work

- Kalgoorlie Regional Hospital, The Rural Clinical School and WACHS (Goldfields) is pleased to offer a unique training position for an Advanced Trainee in Paediatrics.
- The position is based in Kalgoorlie and includes acute, emergency, neonatal high dependency care and outpatient paediatrics experience. There is 50% allocation of time to teaching, research, academic and remote work. There will be the opportunity to participate in remote area clinics.
- Good communication skills and experience working with Aboriginal families would be of great benefit in this position.
- You will be working with a team of experienced rural paediatricians and several registrars and RMOs.
- This position would suit someone with a passion for Aboriginal and rural health who is planning a career in rural and remote paediatrics.
- The position is offered for a 12-month term although 6-month terms can be considered.
- 24X7 roster sharing with other junior doctors as first on call, supported by consultant second on call, including some weekend covers.
- Inpatient cover for paediatric ward, maternity and SCN. Review of ED paediatric patients as required and admitting them.
- Outpatient clinic, remote clinic attendance including Griffith's clinic.
- Attend multi-disciplinary team meetings fortnightly and ward review meetings and M&M meetings.
- Teaching of Junior staff, hospital RMOs and medical students.

Service Type

The team includes 4 Paediatricians and 5 trainees (Senior Registrar, Registrar and 2 Residents in accredited Paediatric training positions and 1 community residency trainee).

Our team covers neonates, the paediatric ward, and the emergency department. Outpatient services include remote clinics at Leonora, Laverton, Mount Margaret and Coolgardie and development paediatric clinic attached to Kalgoorlie CDC, and hospital-based outpatients clinic. This will enable the advanced trainees complete their requirements of development paediatrics and outpatient logbooks. We generally have more than 2000 outpatient appointments /year. And visiting sub speciality clinics with PCH include cardiology, endocrine, renal, genetics and obesity and diabetes clinic. Senior registrar will attend the visiting developmental paediatrician 2-day clinic once in 3 months.

Esperance and Norseman clinic attended by Advanced trainee and a consultant.

Advanced trainee will also get opportunity to perform Griffith assessments supervised by Developmental paediatrician.

Staffing and Supervision

4 Consultant paediatricians, junior staffing is as mentioned above.

Potential Rotations

6 months or 1 year.

Experience life in the Goldfields Region as an Paediatric Advanced Trainee can't ...

Teaching and Learning

- Monday afternoon Rural clinical school student teaching.
- Thursday afternoon paediatric ward presentations and PCH Grand rounds via video link, once /month Kalgoorlie hospital Grand round senior registrar get opportunity to present in Grand rounds.
- Friday morning case presentations and teaching.
- Teaching on the run during ward rounds.
- Thursday afternoon RMO teaching by senior registrar once bimonthly.
- Visiting sub speciality consultant teaching during the year.
- Senior registrar involved in arranging RCS student teaching and exams and practise FRACP clinical exam for WA candidate annually held in Kalgoorlie.

Kalgoorlie is Australia's largest outback city, and the heart of Western Australia's Goldfields region - Australia's gold capital. The area is more than three times the size of Victoria and covers almost a third of WA's total land mass.

Community is a key strength of the town. Being located inland the weather in Kalgoorlie is usually sunny, giving options to explore the outback and beach-side Esperance during your time off.

Kalgoorlie Health Campus is a 100-bed inpatient facility and the largest regional public hospital in WA. When you join the team at Kalgoorlie Health Campus, you'll become part of a close-knit community of health professionals including specialist general physicians, surgeons, paediatricians, OBGyn and emergency medicine doctors.

The hospital supports medical students through the Rural Clinical School, junior doctors rotating from Perth, Workplace Based Assessment doctors and registrars across a number of specialties. Fly in fly out clinicians and private clinicians provide additional supportive health services to the region.

TESTIMONY - Dr Javeed Iqbal

“I strongly believe that that regional exposure as a Paediatric Advanced Trainee is very important, useful and fulfilled my paediatric fellowship experience.”

I was born and brought up in Jammu and Kashmir norther most part of India, beautiful place surrounded by three mighty countries (India, China and Pakistan). Kashmir valley is a very beautiful place on earth has classical four seasons. Kashmir has meadows, lakes, rivers Forrest and beautiful mountains. In winter we see lot of snow, skiing and other winter international sports event are held each year. I am in Australia for last around 5 years.

My Medical journey began in India, where I completed my medical schooling and paediatric training. This large tertiary hospital and medical school in India, provided me with a solid foundation.

Venturing into rural healthcare, I embraced a transformative experience in 2023 as an advanced trainee paediatrician at Kalgoorlie Hospital and remote clinic experience in Esperance, Leonora, Laverton and Mount Margaret which is an extremely rare opportunity for any trainee in metro to be able to gain. Managing patients, particularly Indigenous communities, enriched my clinical acumen. Additionally, I found joy in teaching medical students at a rural medical school.

Life in regional areas offers tranquillity, fostering a conducive work environment with manageable hours. I prioritized my physical well-being, maintaining a consistent exercise regimen—a notable departure from the bustling metropolitan hospitals. Many trainees echoed similar sentiments, citing enhanced study time and boosted confidence in patient care.

Initially hesitant about rural placements, my perspective shifted upon commencement of work placement. Witnessing firsthand the local perspectives on health and illness, I gained invaluable insights into patient and cultural management. Building trust with patients proved challenging yet rewarding; effective communication, including visual aids, bridged many gaps.

Participating in rural outreach clinics deepened my understanding of developmental paediatrics and prevalent regional conditions like rheumatic heart disease and dermatological ailments. Regular clinical teachings, both bedside and theoretical, supplemented my learning. I am grateful for the extensive experience and support WACHS has provided to me.

I commend my supportive supervisors, whose never-ending support and availability eased my professional and personal challenges. Hospital facilities, coupled with subsidized accommodations, facilitated a conducive learning environment.

Professional challenges occasionally surfaced, such as staffing shortages necessitating patient transfers, while personal hurdles included prolonged separation from family during extended stays.

Despite the challenges, regional training has been transformative, exposing me to rare medical conditions and offering a healthier work-life balance. It has reaffirmed my aspiration to excel as a paediatrician, with a desire to return to regional practice in the future.

I firmly advocate for regional exposure, believing it to be integral to comprehensive paediatric training. In my view, a paediatric fellowship remains incomplete without such invaluable regional experience.

“There are fantastic travels and adventures to be had across this diverse land and a seascape, which is a four-hour drive from town.

“I would strongly recommend Kalgoorlie Health Campus for anyone want to grow their career and have an experience of lifetime.”

TESTIMONY - Dr :Danielle Scoones

**“Give it a go!
You'll get some of the
best experience of your
training and it might just
open a whole new career
path you'd never
considered!”**

My experience with WACHS has opened my eyes to what it is to be a rural paediatrician, and it's something I now want to experience more of post-fellowship. It has made me realise how fortunate we really are to have such skilled clinicians in some of the remotest areas of our state and I am so grateful to have spent so much of my training time learning alongside them.

I was born and raised in the Perth Metro area, with ancestral links to the Pilbara and Kimberley regions.

I did my internship and first year residency at the wonderful Fremantle Hospital (in the days before FSH) before making the move to paediatrics at Princess Margaret and never looking back

I did Rural Clinical school in Geraldton and loved it. I then did a year of my paediatric advanced trainee in the Pilbara, after which I moved to the Kimberley where I've been for the last 15 months and plan to complete my training later this year.

I actually sort of stumbled into Rural Training – I moved my young family to Port Hedland to complete my rural term as part of my paediatric advanced training. I instantly loved the incredible variety and skill mix in rural paediatrics, and my family loved the lifestyle and adventures of living rurally - we soon realised we didn't want to move back to the city! I then found out I was able to complete all my remaining training requirements rurally and applied to the Kimberley region where I've been for the last 15 months.

I've had the incredible privilege of working in remote Aboriginal communities. I've done neonatal retrievals from across the Pilbara and Kimberley regions. I've started a workday in a remote developmental clinic and ended it in a neonatal resuscitation of a pre-term baby. I've then had the joy of seeing that baby thrive in outpatient clinic in that community for the next 12 months! The variety and autonomy is unrivalled by any training position I know of in the city.

My experience as a paediatric trainee in a rural area is that you can be as autonomous as you feel ready for. Registrars are rostered first on call with the back-up of a consultant when needed. It's the perfect training setting to develop professional confidence and prepare for consultant life in a supported learning environment.

I've found the rural supervision has been great. I work closely with my supervisor's week in week out, so I think they are able to gain greater understanding of my clinical abilities and challenges and provide more tailored feedback and support to help me achieve my training and career goals. I am fortunate to work with some inspiring clinicians who have provided mentorship beyond their roles as supervisors, and who I'm sure I will remain in touch with throughout my career.

Challenges encountered professionally, it can sometimes be tricky living in a small town and running into patients and colleagues everywhere! Personally, living away from family and friends is hard of course.

Rewards experienced professionally, being able to stay in one training position for so long has been so rewarding. So often as trainees we have 3 or maybe 6 month rotations before we move on again. Having 1-2 years in one location allows you to develop professional relationships as well as experience providing longitudinal care for patients and their families in the community.

Rewards experienced personally, the memories we have created through the camping and outdoor adventures I've had with my family in the amazing North-West as well as the experience of working in a close-knit supportive team.

“Working rurally also provides the opportunity to work with some of our most disadvantaged but strong and resilient Australians who continue to teach me so much about what really makes a good doctor.”
